

Saint-Lô Thère

Lycée Agricole et Agroalimentaire - Ecole Nationale d'Industrie Laitière

Right in the heart of Normandy, an area well-known for its dairy traditions, the agricultural college of Saint-Lô Thère very early developed a natural link with the dairy process sector. The ENIL (National Engineering Dairy School) of Saint-Lô Thère was created so as to meet the need for training courses in the food technology sector.

The ENIL is an example of the strong relationship that links the agricultural sector to the food technology one, both belonging to the dairy sector. The college comprises 5 independent educating centres where 400 full-time students and 250 part-time students are taught.

1. THE COLLEGE

☞ **The LEGTA** : the agricultural, technical and comprehensive college is based at Le Hommet d'Arthenay (Manche, France)

☞ **The CFA** : professional training centre in agriculture and food technology (through apprenticeship/ for part-time students)

☞ **The CFPPA** : adult professional training centre in food technology and agriculture.

☞ **The school farm** : the 70-hectare school farm breeds 40 cows (Normandes and Prim'Holstein), 35 Roussine ewes and 120 sows for fattening. The yearly milk quota is 250,000 litres, 100,000 of which are processed at the College's food processing facilities.

☞ **Food Processing Facilities** : The 3,000 m² Food Processing Facilities were built in 1993 in Saint-Lô, 10km from the College. It comprises 2 separate buildings

Bat 1 : Classrooms, chemistry and microbiology laboratories

Bat 2 : **Dairy processing units**

- Skimming, pasteurisation, ultrafiltration ...of milk soft cheese making unit (camemberts) and hard cheese making unit (Saint-Lois, St Paulin...)
- Fresh dairy produce production : (fermented milks, dairy
- desserts, butter, cream...)

Food processing units

- bread, cookies and Viennese buns (pains au chocolat, croissants...)
- pâtés, delicatessen food
- fish soups
- frozen produce

2 TRAINING COURSES

Agricultural courses

- BEPA :vocational certificate in farm management
- Bac Technologique :A levels (ND) in agricultural technics(practice) and environment
- Bac Professionnel : A levels (ND) in breeding and herd management
- BTSA ACSE : HND in breeding and herd management
- BTSA PA européen : HND in farm management (1 year in Saint-Lô Thère, France & 1 year in Bridgwater College, England)
- Licence professionnelle : a degree (3rd year) in farm management

Food technology courses

- BEPA : vocational certificate in food processing
- Brevet Professionnel Agricole “laiterie” : vocational certificate in dairy processing
- Brevet Professionnel Agricole “agro-alimentaire” : vocational certificate in food processing
- Bac Professionnel “Bio Industries de Transformation” : A levels (ND) in food processing
- Bac Technologique “ Sciences et Technologie du Produit Alimentaire” : A levels (ND) in sciences and food technology
- BTSA “lait et IAA” : HND in food and milk processing
- BTSA IAA européen : HND in food technology (1 year in Saint-Lô Thère, France & 1 year in Bridgwater College, England)
- Certificat de spécialisation “qualité et fromagerie traditionnelle” : training course in quality and traditional cheese making
- Licence Professionnelle “maintenance industrielle et IAA” : an degree (3rd year) in maintenance in food industries (industrial engineering)

Strong relationships lie between Saint-Lô Thère and universities (engineer courses...)

Workers' training courses in industrial plants, international co-operation and experimentation are some of the other activities led by the ENIL
